What is a recurrent event?

Vs

In 1917 Amedeo Modigliani creates an oil painting depicting Hanka Zborowska

Art Biennale is held biennially

What is a recurrent event?

Art Biennale has been held biennially, since 1895, and has:

- the Biennale Foundation as **event organizer**
- Venice as **event place**
- the promotion of new contemporary art trends as **mission**
- a **time period** of ~2 years between two consecutive occurrences

Proton

C Recurring Event (OWL Class)

Recurring sequence of events, such as Olympic Games, etc..

This class is a sub class of **C** Happening (OWL Class)

Something that happens.

P Current Frequency (Property) **DP**

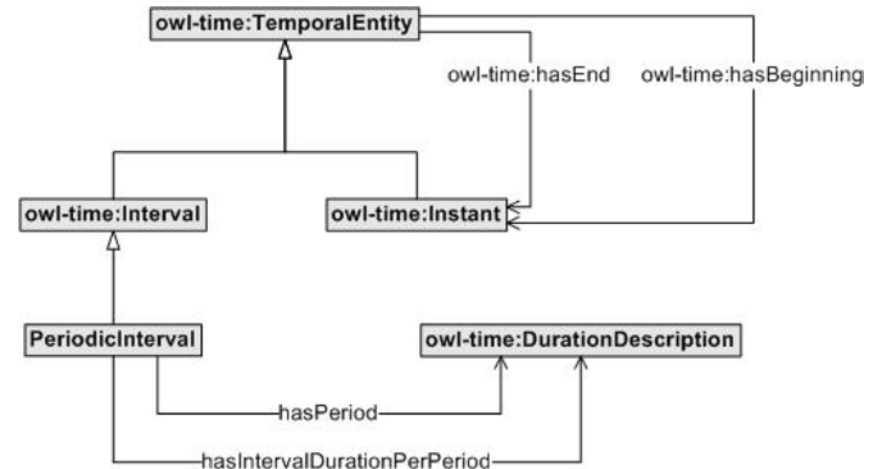

The relation between a recurring event and its frequency.

P Recurring Event Instance (Property) **OP**

C Event (OWL Class)

Submissions:PeriodicInterval

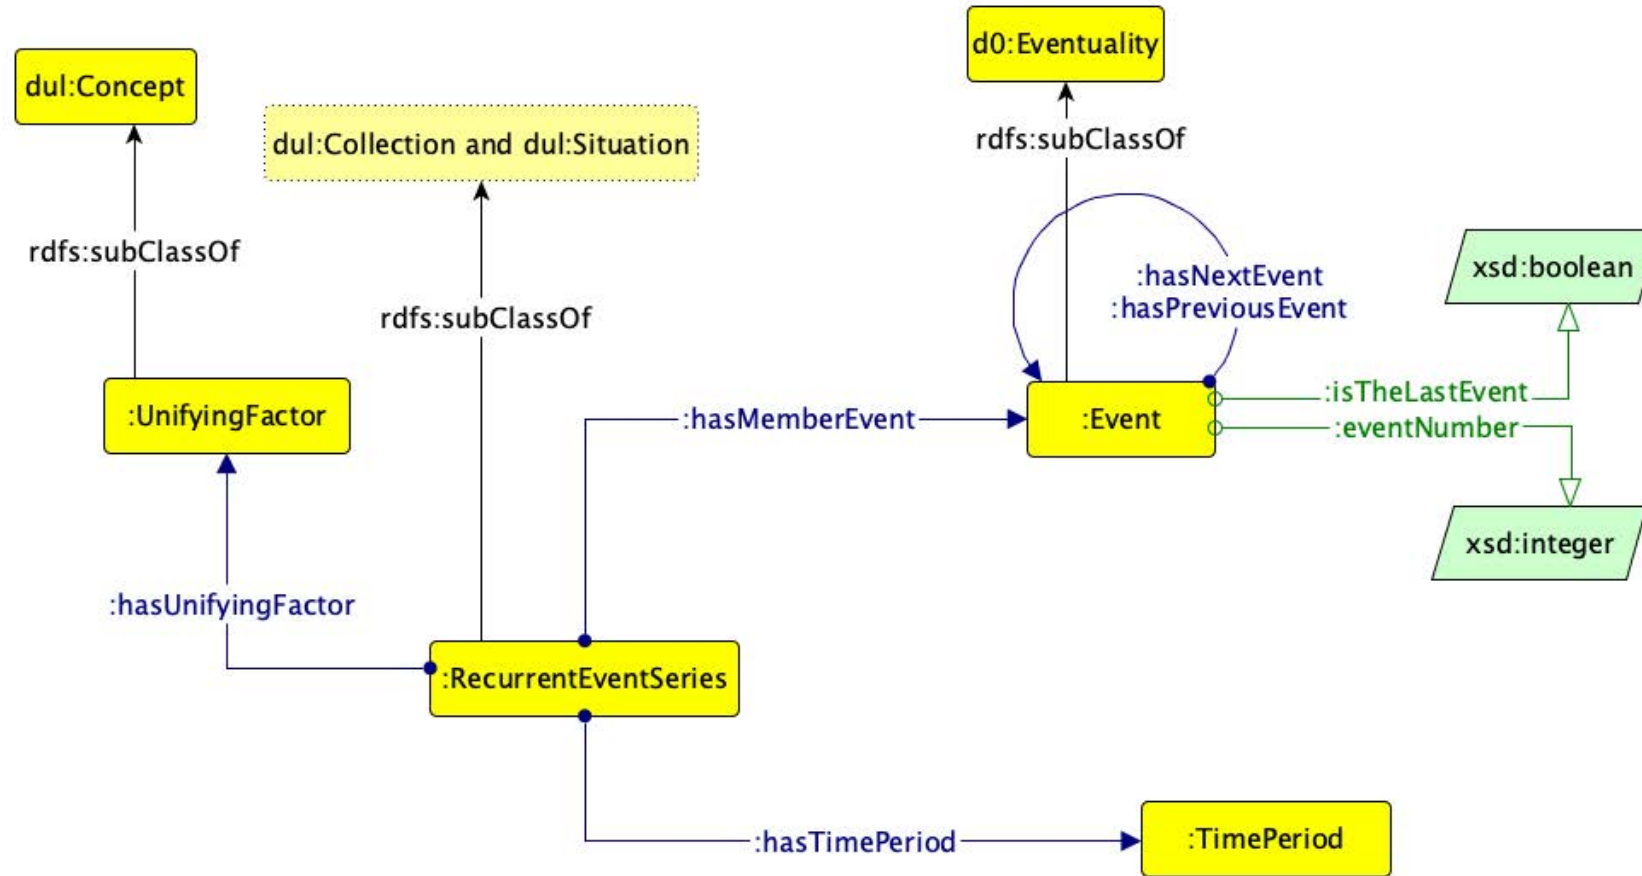

Competency Questions

ID	COMPETENCY QUESTION
CQ1	Which are the events of a recurrent event series?
CQ2	Which is the time period elapsing between two events of a recurrent event series?
CQ3	What are the unifying criteria shared by all the events in a recurrent event series?
CQ4	Which is the (immediate) next event in a recurrent event series?
CQ5	Which is the (immediate) previous event in a recurrent event series?

RecurrentEventSeries ODP

```
Prefixes
: http://www.ontologydesignpatterns.org/cp/owl/recurrenteventseries.owl#
dul: http://www.ontologydesignpatterns.org/ont/dul/DUL.owl#
d0: http://www.ontologydesignpatterns.org/ont/d0.owl#
rdfs: http://www.w3.org/2000/01/rdf-schema#
xsd: http://www.w3.org/2001/XMLSchema#
```

»»» :RecurrentEventSeries

Recurrent event series as an intersection of Collection and Situation

its members are of type Event

dul:Collection and dul:Situation

rdfs:subClassOf

:RecurrentEventSeries

:hasMemberEvent

d0:Eventuality

rdfs:subClassOf

$$\text{RecurrentEventSeries} \sqsubseteq \exists 0 \text{hasMemberEvent} . \text{Event}$$

$$\text{Event} \sqsubseteq \text{d0:Eventuality}$$

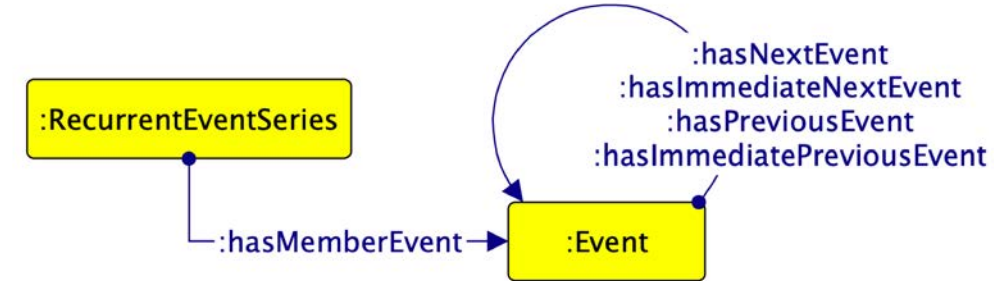

$$\text{RecurrentEventSeries} \sqsubseteq \text{dul:Collection} \sqcap \text{dul:Situation}$$

$$\text{RecurrentEventSeries} \equiv \exists \text{hasMemberEvent} .$$

$$(\exists 0 \text{hasNextEvent} . \text{Event} \sqcap \exists 0 \text{hasPreviousEvent} . \text{Event})$$

↕ :hasNextEvent, :hasPreviousEvent

The member events are
in sequence

These properties relate only events
member of the same recurrent event series

example for :hasNextEvent

```

PREFIX recurrentevent: <http://www.ontologydesignpatterns.org/cp/
                        owl/recurrenteventseries.owl#>
CONSTRUCT {?re1 recurrentevent:isLocallyInconsistentWith ?re2}
WHERE {
  ?re1 recurrentevent:hasMemberEvent ?event1 .
  ?re2 recurrentevent:hasMemberEvent ?event2 .
  ?event1 recurrentevent:hasNextEvent ?event2 .
  filter not exists {?re1 owl:sameAs+ ?re2}
  filter (?re1 != ?re2)
  filter (?event1 != ?event2)
}

```

if not, running
queries like this
generates triples
asserting local
inconsistencies

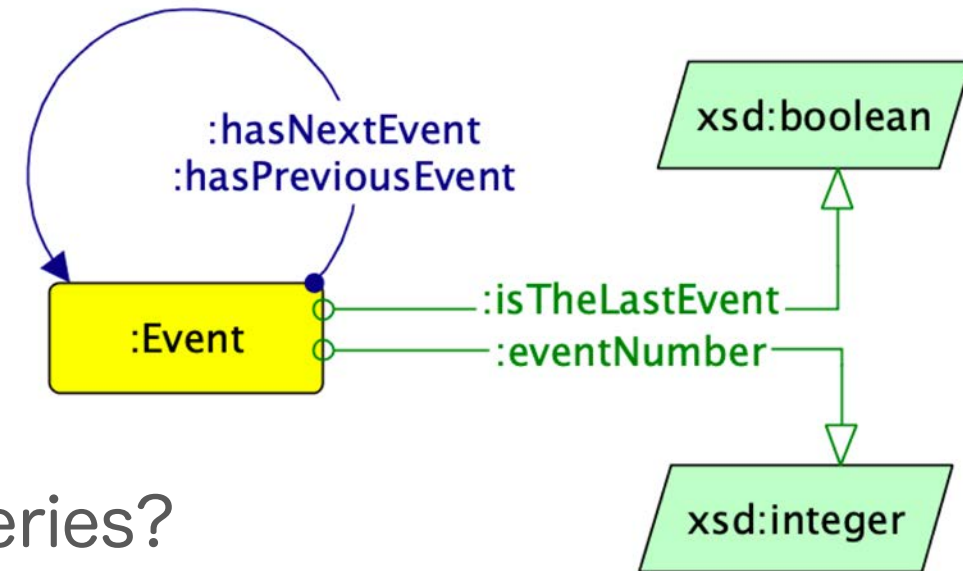

:isTheLastEvent

Is this event the last event of the series, or not?

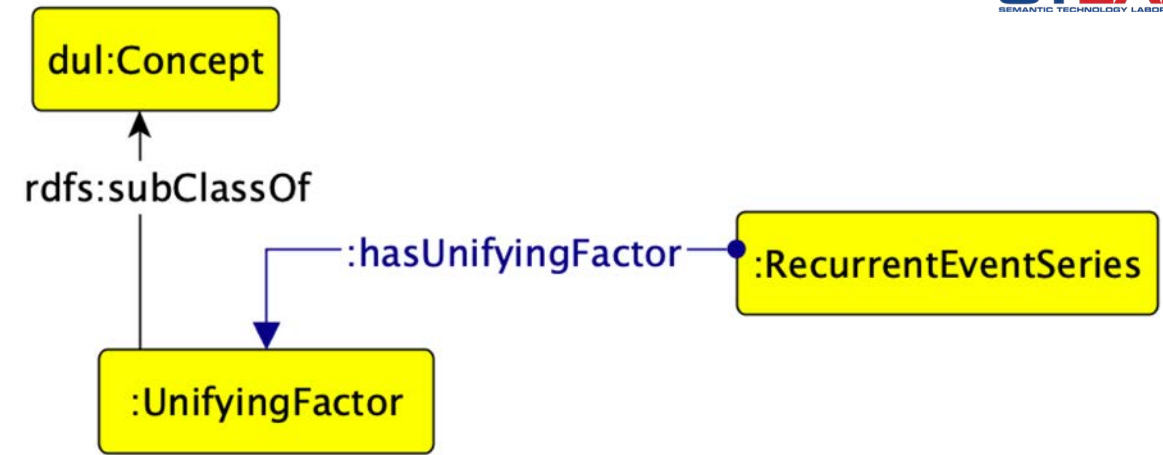

:eventNumber

Which position this event has in the series?

:UnifyingFactor

at least one element
or property
occurs in each event member
with some degree of flexibility

`RecurrentEventSeries ⊑ ∃hasUnifyingFactor.UnifyingFactor`
`UnifyingFactor ⊑ dul: Concept`

e.g.

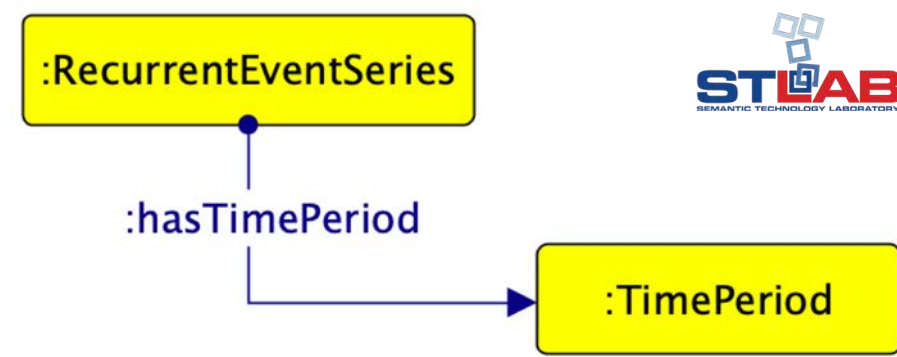

topic

place

organizer

...

:TimePeriod

It represents the recurrence of a Recurrent Event Series

approximated temporal distance

between one member event and the next and the previous ones

`RecurrentEventSeries \sqsubseteq \exists hasTimePeriod.TimePeriod`

It works as a parameter

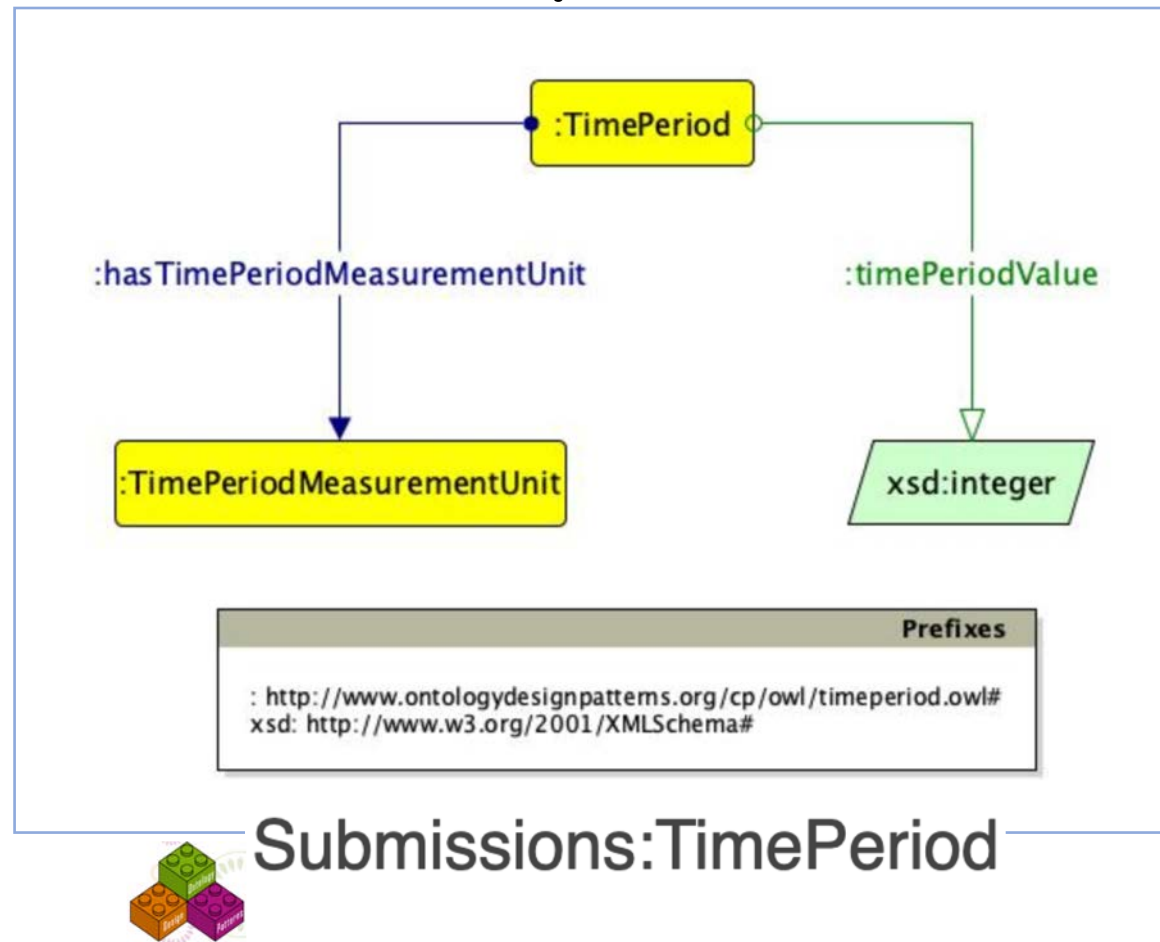

region of valid values

future work

Estimated or Observed
time period?

e.g. possible implementation

Example

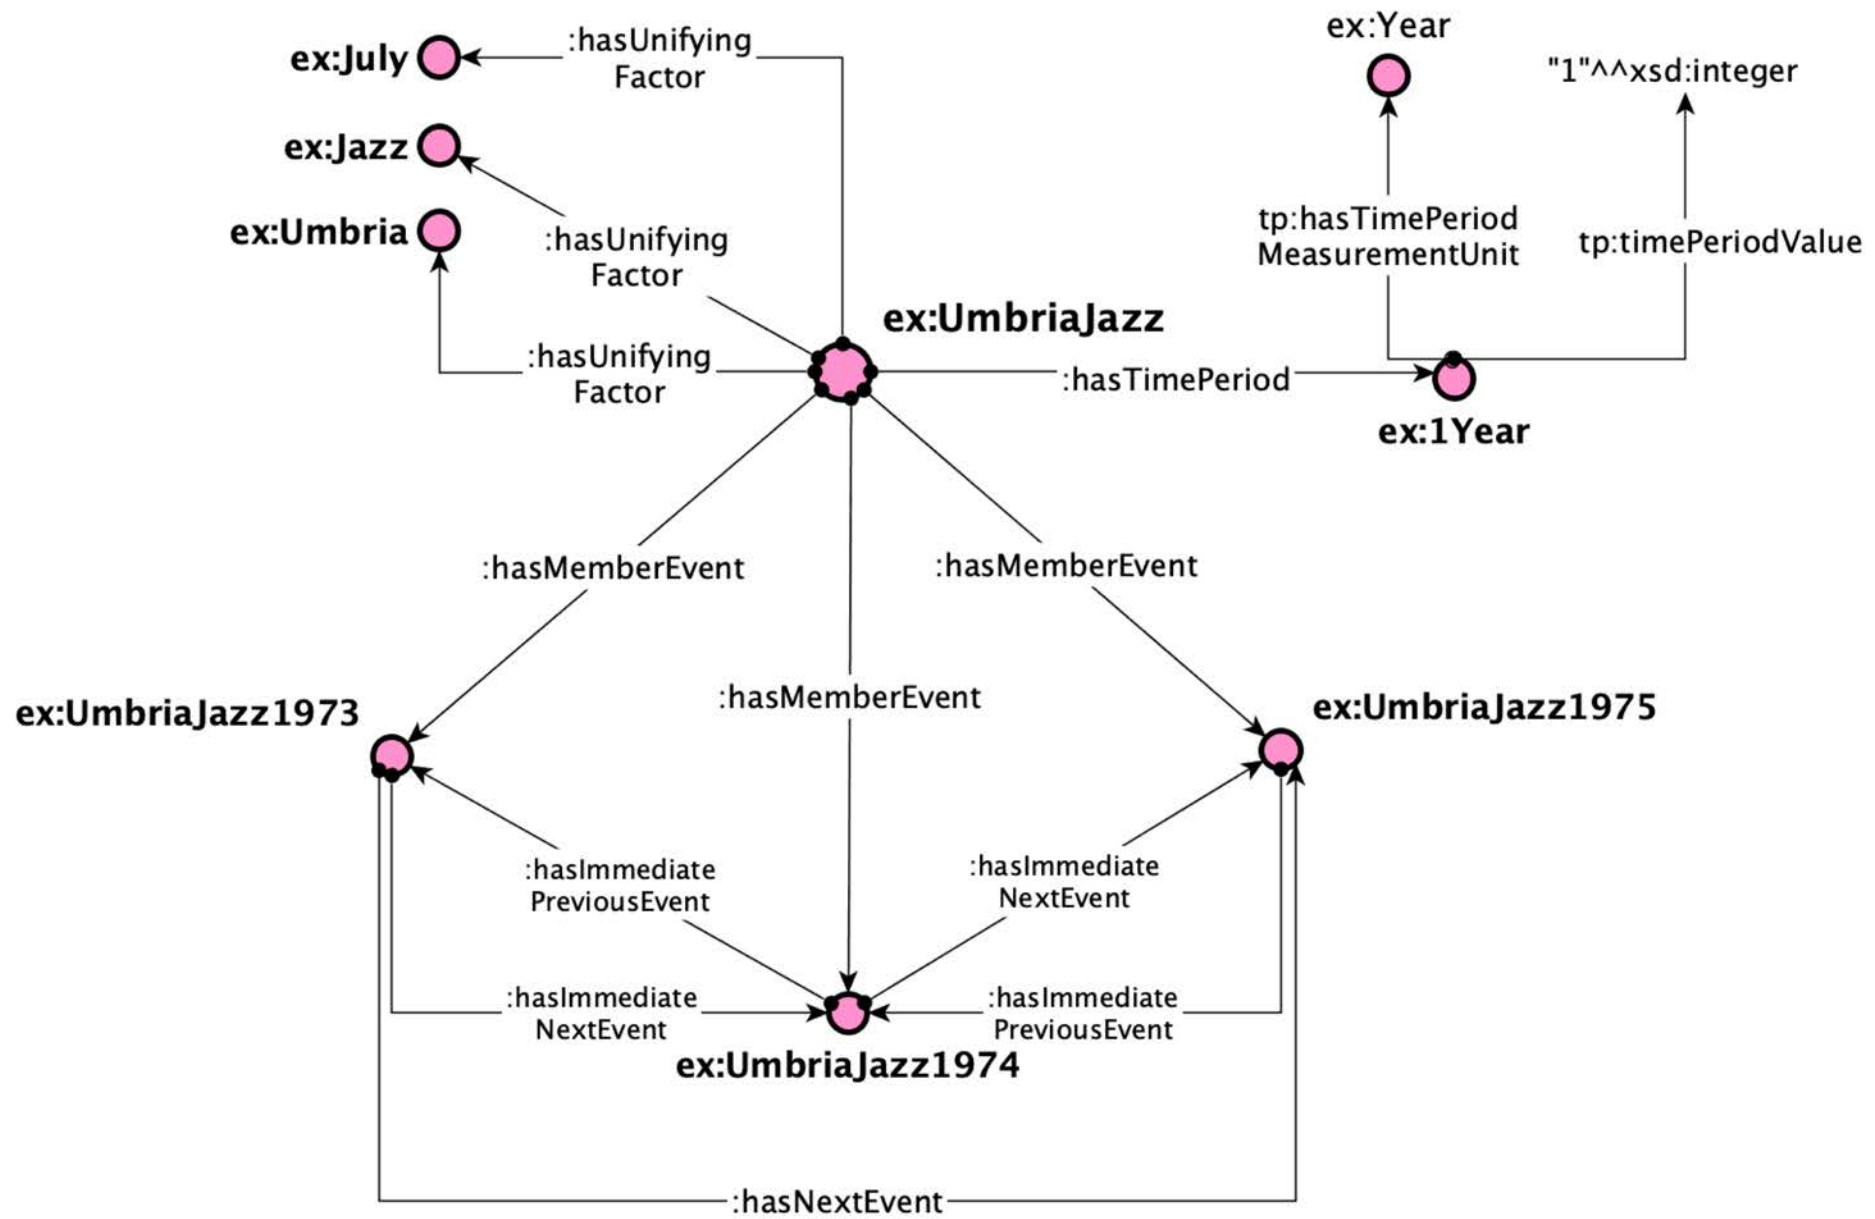

Umbria Jazz has been held annually, since 1973, and has:

- the musical genre jazz as **topic**
- Umbria as **event place**
- July as **month** in which it usually* takes place
- a **time period** of ~1 year between two consecutive occurrences

* always since 1976
1974 and 1975 started in July and ended on August 1st
1973 was held in August

```
Prefixes
: http://www.ontologydesignpatterns.org/cp/owl/recurrenteventseries.owl#
tp: http://www.ontologydesignpatterns.org/cp/owl/timeperiod.owl#
ex: http://example.org/
```

Future work

- Traditional ceremonies, festivals, cultural events, but also:

- sunrise 
-  • periodic migrations of animals
-  world days
 - train schedule 
-  • medical prescriptions 
- periodical supply of services

natural origin

set by humans

part of a workflow

- Recurrent Event as a **fluent**?

 Thank you!
